Ashish Kharche

QA Engineer (mobile and web) | Test automation, Maestro, XCUITest and CI

thekharche@gmail.com | +44 7824 886442 | linkedin.com/in/ashish-kharche | github.com/ashishkharche | ashishkharche.com | London, UK

Right to work: UK Skilled Worker visa (current). Sponsorship needed to change employer. Available immediately.

Relevant Experience

Quality Assurance Engineer | SpaceX Super Intelligence (SpaceXSI), formerly xAI

January 2026 to October 2026

- Retested more than 500 Grok iOS and web app builds before each release, across chat, Imagine, Build and MCP, plus payments, subscriptions and sign-in.
- Checked each build's list of changes and approved it for release.
- Reported bugs in Linear with clear steps to reproduce them, and worked with engineers on each bug until the build was ready to ship.

Senior Mobile Engineer | Paythru Limited

March 2024 to October 2026 | London, UK

- Contributed to Paythru's new TypeScript payments platform on AWS (2026), designed for 10,000 terminals.
- Wrote payment tests that fail on the old code and pass on the new, covering timeouts, server errors, retries, a database stopping mid-operation, and late, duplicate or out-of-order notifications.
- Cut release time from a few weeks to a few days by rebuilding the build and release pipeline (Bitrise), so any change could go to the app stores.
- Built EV charging features in Kotlin and Jetpack Compose and added Adyen payments in the app and on the terminals.

Mobile Engineer | Paythru Limited

October 2022 to February 2024 | London, UK

- Tested six branded apps with about 100,000 sessions on Android, using Maestro, JUnit and screenshot comparison tests.

Developer (contract, alongside Paythru) | Maestro (maestro.dev)

March 2023 to September 2024 | mobile app testing tool

- Wrote about 10 sets of iOS and Android tests covering four main features for Maestro Cloud and Studio, run automatically on Maestro Cloud, GitHub Actions and Bitrise.
- Created product guides and starter example projects.
- Published 14 posts on the Maestro blog (maestro.dev/blog) about testing Android and iOS apps, including faking server responses with WireMock, React Native, Expo and Flutter.

Certifications

AWS Certified Solutions Architect - Associate

AWS Certified Cloud Practitioner

Skills

Test automation

Maestro (Cloud, Studio), Appium, XCTest, XCUITest, JUnit, Playwright, Cypress, Vitest, Jest

Testing approach

regression, release, end-to-end and failure-case tests, WireMock

Platforms

iOS, Android, web; React Native and Expo, Flutter

CI/CD

Maestro Cloud, GitHub Actions, Bitrise, fastlane, TestFlight

Tools

Linear, Firebase Crashlytics, PostHog

Development

Kotlin, Swift, SwiftUI, TypeScript

Education

Kingston University

September 2021 to September 2022 | London

MSc Software Engineering

Government College of Engineering Aurangabad

2016 to July 2020 | Aurangabad, India

Bachelor of Engineering (BE), Computer Science

Projects

Workout Director

App Store, Shelgaon Ltd, live since Oct 2026

Camera rep counter and voice coach for gym and home workouts.

Built with SwiftUI, MediaPipe and WebRTC.

Kalo

App Store, Shelgaon Ltd

Calorie and macro tracker: log a meal by photo, voice or barcode.

Built with Swift and SwiftUI; tested with XCTest and XCUITest on a real device.
